

How to build a Lego Chompy from Skylanders™

(With 21 pieces)

Parts:

- 2 black studs
- 4 white studs
- 2 green flat studs
- 2 thin black horizontal grab pieces
- 2 thin green horizontal pieces with stud holders
- 4 green cones
- 2 thin green 2 by 1s
- a thin green circle 2 by 2
- a green 2 by 2
- a green 2 by 1

Directions

Flip the 2 by 2 over and place 2 cones on it diagonally.

Next, flip it upright and place 2 white studs on top next to each other

After that, put the thin green horizontal pieces that studs can be placed on behind the white studs facing in opposite directions.

Then place the thin black horizontal grab pieces on the thin green horizontal pieces that studs can be placed on in the direction shown.

Next, put the flat green studs on the thin black horizontal grab pieces as shown.

After that, place the green 2 by 1 behind the white studs.

Set it aside for a moment, now take the thin green 2 by 1s and place the 2 remaining white studs under each as shown.

Place these on the green 2 by 1 so the white studs are over the other white studs. Then place the thin green 2 by 2 circle at the top as shown.

Again, put it aside for a moment to do the next part. Take the remaining 2 black studs and 2 green cones and put the studs on top of the cones.

Put these on top of the green circle in opposite corners of the legs and TA-DAAA! A hand-held Chompy out of Lego bricks! If you don't have the right pieces and/or colors you can make different Chompies and/or a bite function. Have fun!
